

WorkCapcha for Finance Leaders

Let WorkCapcha help your firm convert more time into revenue

Traditional time tracking can be an inaccurate, painful and time-consuming task that detracts from chargeable client work. Employees are limited to recording activities they can remember, rather than fact.

For finance leaders, there's endless pressure to increase financial gains and to provide greater insights to help drive the firm's overall performance.

It's time you let WorkCapcha transform more time into revenue through accurate, intelligent time recording.

After all, your time matters. So let us help you make the most of it.

Introducing WorkCapcha

CloudCapcha is reinventing time recording in the accounting world with WorkCapcha.

WorkCapcha is the only intelligent time and activity recording tool that sits inside Microsoft Teams.

The application automatically tracks, converts, and analyses the user's digital journey from existing accounting applications. It empowers firms to create more revenue and use insights to drive firm performance.

WorkCapcha's smooth set-up process means firms can be up and running quickly with minimal disruption to users' time.

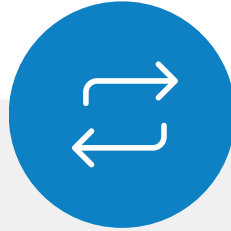

How does it work?

Track

Track calls, emails, meetings, and activities from your accounting applications and these activities will automatically appear in your DayBook so you don't have to remember what you did yesterday.

Convert

Employees are presented with their digital journey first, so they decide what to convert from their DayBook into their timesheet. The time entries then appear in your Practice Management System, ready for billing.

Analyse

Turn accurate data into relevant insights that have never been seen before to boost productivity and profitability through efficiency.

Benefits

- Increase billing with revenue leakage minimised
- Improve gross margin using insights into the cost of production
- Supercharge the WIP creation process
- Use insights from accurate data to help drive firm productivity
- Support firm wellness objectives with clear oversight into employee working hours
- Further expand insights through the building of custom, enhanced reports
