

WorkCapcha for IT Leaders

Let WorkCapcha empower your firm to bill more

Traditional time tracking can be an inaccurate, painful and time-consuming task that detracts from chargeable client work. Employees are limited to recording activities they can remember, rather than fact.

For IT Leaders, migrating to the cloud is now a top priority to support hybrid working and optimise client services.

You also face additional pressure to demonstrate more value from existing IT solutions and ensure all these tools work seamlessly together.

WorkCapcha is the ideal application to help firms get the most from their existing Microsoft investment by intelligently recording time, inside Microsoft Teams.

After all, your time matters. So let us help you make the most of it.

Introducing WorkCapcha

CloudCapcha is reinventing time recording in the accounting world with WorkCapcha.

WorkCapcha is the only intelligent time & activity recording tool that sits inside Microsoft Teams, in the cloud.

The application automatically tracks, converts, and analyses the user's digital journey from existing accounting applications. This enables firms' employees to focus on their clients and make every second count.

WorkCapcha's smooth set-up process means firms can be up and running quickly with minimal disruption to users' time.

How does it work?

Track

Track calls, emails, meetings, and activities from your accounting applications and these activities will automatically appear in your DayBook so you don't have to remember what you did yesterday.

Convert

Employees are presented with their digital journey first, so they decide what to convert from their DayBook into their timesheet. The time entries then appear in your Practice Management System, ready for billing.

Analyse

Turn accurate data into relevant insights that have never been seen before to boost productivity and profitability through efficiency.

Benefits

- Maximise existing Microsoft 365 investment
- Empower your firm to bill more and increase profitability
- Benefit from an enterprise-wide tech stack
- Easy to install as it sits inside your Microsoft Teams environment
- Integrates with existing accounting applications so there's no need to change existing processes to capture data from a variety of third-party systems to support the accuracy and transparency of time tracking
- Intuitive so users can pick up the system in minutes as it uses the functional and familiar Microsoft Teams interface
- Reduce the number of employees accessing legacy on premise PMS through legacy tools
- Built in security through Microsoft Teams that allows employees to safely work from anywhere
- Ability to capture data from a variety of third-party systems to support the accuracy and transparency of time tracking
- Further expand insights through the building of custom, enhanced reports

'We love WorkCapcha. It's helping us to see the true cost of a job. Most of all, it saves our people approximately 40 minutes a day compared to manually completing a timesheet'

Toby Woodhead, Head of Technology at Armstrong Watson
